GRAPHIC IDENTITY STANDARD GUIDE

ISSUED MAY 2021

MISSION

Our mission is to spread kindness in the form of freshly baked cookies to lift the spirits of essential workers. We strive to recognize and reinforce every worker's value in our community.

ABOUT

Short:

Cookies for Caregivers was created as a reaction to the COVID-19 experience in 2020. Two dads decided to show their gratitude to the essential workers in their community by delivering them freshly baked cookies.

Long:

In April 2020, Scott McKenzie and Jeremy Uhrich found themselves at home in the middle of a global pandemic. Instead of allowing himself to feel bored and restless, Scott decided to try something new: baking. He made a post on Facebook showing off the first cookies he had ever made from scratch. When Jeremy saw his friend's post, his competitive spirit kicked in. He bet that he could make even better cookies and challenged Scott to a bake off. Even though they were making the best of their situation with a friendly baking competition, they couldn't forget everything that people were going

through with the COVID-19 pandemic. Workers deemed "essential" were still out in the world, serving their communities. Scott and Jeremy decided to show their appreciation for the caregivers in their own community in Huntingdon, PA by delivering them the freshly baked cookies they made. This idea resonated with people as news of their baking spread. Volunteer bakers all across North America were inspired to form their own Cookies for Caregivers groups. As of April 2021, there are 109 total groups across the nation and into Canada.

GROUP IDENTIFICATION

HUNTINGDON, PA

LANCASTER, PA

The name of the respective group appears in all caps. The size of the font is determined by the length of the words. No line of type should exceed the width of the logo.

THE STORY OF OUR LOGO

ORIGINAL LOGO DESIGN

The original logo created by Lauren was quickly developed as Cookies for Caregivers was established during the COVID-19 pandemic. While it served its purpose in the foundation of their organization, it was not fully functional for all production purposes. A new and more simplistic logo was created based on the original design. Many thanks to the original creator, as the logo has been adapted to the needs of Cookies for Caregivers.

BREAKDOWN

The heart shaped chocolate chips in the cookies show that each cookie is baked with love and appreciation.

The added textured effect was created with an image of flour. The texture both symbolizes baking and gives the logo an old fashioned feel that is reminiscent of using baking to give thanks.

The bite from the cookie represents the action of eating a cookie.

Shifting from a sans-serif font to a more handwritten script font for "caregivers" represents the idea that the organization is welcoming to all who are willing to participate.

The combination of blue and tan gives off a sense of warmth and symbolizes loyalty. The colors are not harsh, creating a calming effect.

INCORRECT LOGO USAGE

Don't stretch the logo out of proportion

Don't place anything too close to the logo

Don't remove the words from the secondary logo

Don't place the logo on a busy background

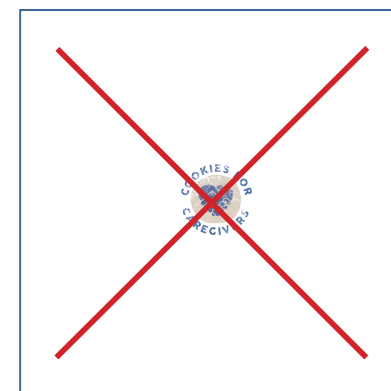

Don't change the colors of the icon

Don't use a frame around the logo

Always use contrasting colors

Don't make the logo too small

Happy Anniversary!

We are celebrating the 1 year anniversary of Cookies for Caregivers! We took the time to reflect on where we started and how we got to where we are today. A year ago, we had no idea what this group would become. We are grateful for all the help and love our little movement of kindness has received.

SOCIAL MEDIA

Social media banner

Instagram is used to share photos and videos of events, and can be done either through posting to the main feed, or as an Instagram story (same as Facebook). Instagram and Facebook can be linked so that stories will post to both platforms. As a business account, Instagram also gives you the ability to view various analytics such as follower demographics, active follower times, post engagement and more. Instagram Live is also another feature that can be used during events, so that individuals who cannot attend are still able to partake in a way.

There are a number of ways Facebook can be used to promote and organization. The Cookies for Caregivers page is fully public and aims to serve as a central information hub of all chapters. The page can be used to post organization-wide announcements and updates. Facebook Groups tend to be more personal, and can be made public or private. It is recommended that each chapter creates their own group, so that they can communicate directly with their members, as opposed to posting publicly. Facebook stories are posts that stay up for 24 hours from time of posting, and can be used to post live photo and video updates for users to see.

Twitter enables users to post short 140-character messages to their feed. Twitter is mainly used for quick updates, or to share a message out faster (by asking to retweet). Twitter should be used for posting routine updates and personal stories. Cookies for Caregivers should share a few images of their work here from time to time. Twitter also has a story feature called Fleets, which are not as popular as Facebook/Instagram stories, but still remain effective. Twitter c
